**Subject:** Questions about Dimock Water

Hi again,

I wondered if you could answer these questions in addition to my previous posts about EPA's Dimock water tests, they are more in depth?

How does the water compare to legal limits for public water supplies?

Would a restaurant in the area be allowed to serve water of the same quality?

Are there any chemicals in the water that are known carcinogens at the levels in which they are found?

What standards does the EPA use to evaluate private water supplies?

Does the data indicate that the water may present a mid- or long-term threat to users?

What chemicals was the water tested for?

At what usage level, or at what health or age might the water present a threat? That is, is the water an issue for the elderly, immune compromised, or young?

After what duration should an individual stop drinking this water?

How much of this water is acceptable to drink each day?

Is it safe to shower and inhale the water vapor from this water?

**Subject:** Dimock Water

*Hi Trish and Dave,*

*I am one of the people who met with the EPA last month in Philadelphia. Today Energy In Depth published this letter (below) to prove that Dimock has no problems with their water. Is this letter real and if so what did the EPA test for? Are the results available to the public?*

*As you know the families in Dimock have stopped having any water delivered to them. They are not drinking their water. People want to help them but the EPA's letter will be devastating to them.*

*Person to person, would you drink the water from the families wells in Dimock, the well's EPA tested?*

*Sincerely,*

*Montrose, PA*

*Dear Dimock Residents,*

*This email is a follow-up to the visits to Dimock area homes by EPA on November 10, 2011 and the subsequent review of well sampling data for wells impacted by the Cabot Oil and Gas Company drilling activities. EPA has conducted a preliminary review and screening of the data provided by the Pennsylvania Department of Environmental Protection and residents. While we are continuing our review, to date, the data does not indicate that the well water presents an immediate health threat to users. EPA will continue to review available information related to the concerns of Dimock area residents. We are continuing to work with the Commonwealth of Pennsylvania going forward on this issue.*

*Please feel free to call me or David Polish, Community Involvement Coordinator, at (215) 814-3327, if you have further questions.*

*Sincerely,*

*Trish Taylor, Community Involvement Coordinator
